

Microsoft certified .NET/Sharepoint/Azure developers. Even a whole development team.

We solve your .NET developer capacity problems

If you...

- need **professionals** to do **high quality work on time**
- have tasks for even a **whole development team**
- need a **reliable and flexible contractor** you can always count on
- support **remote work**

... **outsource** your development tasks!

We adapt to your needs

It is not a problem for us to become familiar in an **existing system**, and then **fixing bugs**, coding **change requests** or developing **new features** in it.

We are also open to use **new technologies**. We have our own **proven agile** or **waterfall development process methods**, but if it is necessary, we can **easily adapt** to your procedures as well.

You can trust us

By working together, you can expect that **your interests are kept in mind**. We do not take another job, as long as you need us. If one or two development needs are raised after the project has already been closed, feel free to call us, we will **help**. And of course we will do everything to make you and your clients **fully satisfied**.

Expert developers for specific tasks

If you are looking for a professional for a specific role (eg. **architect**, **development lead**, **senior .NET developer**, **DB expert**, **junior ASP.NET MVC programmer**, **test engineer**, etc.), you can select the **best suited available expert** from our team. Our team has professionals with **1-20 years experience**.

Shift the responsibility to us, and sleep quietly!

If necessary, you can **entrust the entire development project to us**: requirement and functional specification, system design, implementation, testing, bug fixing, performance tuning, application maintenance and support.

You get experience

You can expect experts from us familiar mainly in the following programming languages, technologies, tools and products:

C#, ASP.NET, ASP.NET MVC, WPF, WCF, WF, AJAX, jQuery, Entity Framework, Enterprise Library, Telerik and DevExpress controls, JavaScript, HTML, CSS, XML, JSON, XSD, MSSQL, MSSQL Reporting Services, MSSQL Integration Services, OLAP, Visual Studio, TFS, SVN, Git, Unit Testing, CodeSmith, T4 templates, Web Services, IIS, Windows Service, Design Patterns, DDD, TDD, OOP, Windows Cluster, Network Load Balancing Services, Plumtree Portal, MS CRM, MS Sharepoint, MS Biztalk, MS Project, MS Office add-ins, Windows Phone, UWP, Kendo, Angular, Bootstrap, Office 365, Azure, Knockout, etc..

Solutions for the business

We mainly develop **custom business applications** and systems for the following industries:

- ✓ banking and finance
- ✓ telecom
- ✓ production and distribution
- ✓ education
- ✓ healthcare
- ✓ media
